* **INCOMING INTERNATIONAL TEXTS** are not viable with Israel SIM cards – unless they pay for an international text, dialing 001 + 972 + your Israel phone number. WhatsApp, Viber, email, or iMessages are great options.

* **US PHONE NUMBER OPTION:** If you add a U.S. phone number, this will be in addition to your Israeli phone number – you will have two numbers. A U.S. number makes life easier (and less expensive) for those that need to reach you from the US. They will incur no expense; it will be like a local call for them. You also have the option of forwarding your personal phone number to your new U.S. phone number.

* **KEEP SIM CARD OPTION:** If you visit Israel more than once a year and would like to keep your own Israeli phone number, this is a great option. You will save money for shipping and you can even lend your SIM card to friends or family traveling to Israel that have phones requiring the same type of SIM card as you; they would just pay the daily fees.
